Silver Ion / MPS System – HotSpring Aria

Water Capacity: 365 Gallons

At Start-up:

- Fill spa: Adjust pH using test strips and pH Decreaser. Add pH deceiver slowly, not more than ½ TBSP at a time. Run the jets for 15 minutes, then retest.. Add pH deceiver slowly, not more than ½ TBSP at a time. Run the jets for 15 minutes, then retest Add 2 TSP of the Dichlor (Chlorine - Bottle with Blue cap)
- Add 2 Ounces of Stain and scale defense.

At each use but not more than once per day:

- Add 1-1/2 TBSP of MPS (non-chlorine shock). It's best if you add this before you use the spa, but after is OK too.

Weekly:

- Add 2 TSP of the Dichlor (Chlorine) 12 hours before use and run the jets for 10-30 minutes. Cycle the smart jet valve so that the chlorine spreads to all parts of the spa's internal plumbing.
- Add 2 ounces (2 capfuls) of stain and scale defense. This prevents build-up of scale on the equipment.
- NOTE: Check the pH Level. The pH Will likely increase over time, requiring the addition of pH Decreaser. High pH will result in cloudy water and may cause skin irritation.

Monthly:

- Remove filter. Spray with instant filter cleaner, let sit for 15 minutes, and hose off thoroughly. Reinstall filter.

Every Four months:

- Perform weekly chlorine shock, then drain the spa. Clean inside the shell with a rag, and if needed, a very little bit of well-diluted detergent, (most likely you will only need to do this at the water line.)
- Clean filters by soaking overnight in filter cleaning solution. Rinse filters thoroughly and reinstall.
- Replace the FreshWater silver Ion Cartridge.
- Refill the spa using the above instructions for Start-up.

High Use:

After many people have been in the spa, it is a good idea to add the Dichlor per the above weekly care instructions, even if your week is not yet up.
